

Additional Support for EHCP pupils during Lockdown

Part 2

We wanted to put together this pack of additional resources because we recognise that, as a school, not only do we educate we also help implement the care plans shared with us from the therapeutic services.

We know that as we enter another lockdown the access to those therapeutic services continues to be compromised and therefore we hope that we can sign post you to support to help bridge this gap. The support we are referring to includes;

- Speech and Language Therapy (SALT)
- Occupational Therapy
- Physical Therapy
- Sensory Support
